EXPERIENCE

ABOUT

I am a multi-disciplinary creative with a background in fine arts, currently pursuing an education and career in front-end development. I have a very high attention for detail and a deep appreciation for good craftsmanship.

In the past ten years I have worked as a glassblower, I have become very accustomed to working in tightly synchronized teams, and to being aware of where everyone else is in a project.

From glass to music to coding to design, I am extremely motivated by the desire to constantly improve my knowledge and abilities.
